Checklist for Sequencing Projects

Project Title:

Principle investigator :

Project Id:

Institution :

Time(Zone):

Sample collection Metadata

Time(Zone):

Location Country, Site name :

Latitude, longitude :

Sample type : Soil

Collection Protocol/Method :

Mass collected(volume) :

Contextual Parameters Temperature(C) : PH : Salinity(if marine):

For Human host associated Alive Deceased Age group 1 - 18 Gender Female

Handling and Storage Time b/w collection and freezing

Storage temperature(c)

Sequencing method and parameters

Time(Zone):

Sequencing Method:

Sequencing depth(million):

Library Source:

Sequencing Site/company:

Library layout single-end

Platform: Illumina

Intrument Model

Nucleotide extraction

Time(Zone):

Lab technician:

Nucleic acid type:

Extraction type

Extraction Kit/ Kit number

Starting material:

Mass/Volume:

Preprocessing Steps

Lysis method:

Extraction blank included Yes ☐ No ☐

Positive controls included Yes ☐ No ☐

Final elution volume(ml)

Concentration(ng/ul)

Total yield(ng)

Quantification method:

Purity ratios: A260/280

Integrity assessment method:

For Metagenomics

Bead-beating:

Soil/water filteration method

Host-DNA depletion steps

DNase/RNase treatment

Inhibitor removal method

Logistics Storage

Time(Zone):

Storage tempearture (C)

Storage buffer

Aliquot volume(ml)

Total number of aliquots

Type of plate/tube

Barcode

Storage location and conditions

Integrity check Yes ☐ No ☐

Shipping

Time(Zone):

Total samples number

Shipping method

Tracking number

Shipping Temperature(C)

Shipment ID

Integrity check Yes ☐ No ☐

Dry Ice Amount

Sequence delivery and processing

Time(Zone):

Delivery Method

Total samples

Total sequences

Average Depth achieved

Failed samples

Integrity check Yes ☐ No ☐

Reason

Integrity check method

File level metadata

File format

Compression type

Total data size
